SUMMARY

Product Designer with experience designing and developing user-centred products across physical and digital experiences. Skilled in design research, prototyping, and translating user needs into intuitive, impactful solutions. Currently completing an MSc in Design and Digital Media, specialising in UX and Interaction Design, to create meaningful and accessible user experiences.
Available for full-time roles from September 2026.

EXPERIENCE

Product Manager Dec 2024 – Aug 2025
Assistant Product Manager Feb 2024 – Nov 2024

Integral LED (A division of Integral Memory Plc.) | London, UK

- Introduced a new product range that secured a £1M business deal, expanding distribution to 450 UK retail stores.
- Launched 30+ product ranges (~600 SKUs), supporting product development from concept to market launch.
- Conducted user and market research to identify customer needs and inform product requirements, design decisions, and pricing strategy.
- Collaborated with design and compliance to ensure products, packaging and instructions aligned with brand and regulatory requirements.
- Contributed to the creation of a new luxury sub-brand, supporting design consistency and stock migration across product lines.
- Identified key product features for banners and website content to improve marketing strategies and increase sales.
- Liaised between international suppliers and internal stakeholders, achieving a 95% on-time project completion rate.

Design & Marketing Consultant Aug 2023 – Jan 2024
Assistant Designer Jan 2021 – Jun 2021

Skyview Estate | St. Elizabeth, JA/Remote

- Designed and modified recreational areas, housing features and access points using SketchUp.
- Advised on marketing strategies by conducting market analysis and providing print campaign recommendations.
- Designed a business logo and visual identity for the housing development.
- Consulted on design decisions, offering input on selecting professionals for architectural and interior design.

Development Programme Manager Intern Jun 2022 – Aug 2022

Mattel Inc. | El Segundo, CA, USA

- Led a team to design and develop a robotic arm to automate toy car assembly, allowing for significant cost savings.
- Collaborated with a 7-person cross-functional team to design an innovative product based on a provided prompt within 48 hours.
- Accelerated the design approval process by optimising workflows with Adobe Workfront, reducing turnaround time.
- Optimised an existing issue categorisation system, making it more dynamic for informed decision-making.
- Automated issue tracking workflows in Microsoft Excel.

Research Assistant Jun 2021 – Aug 2021

Stanford SHAPE Lab (Haptics Research Lab) | Stanford, CA, USA

- Utilised Fusion 360 to design a 3D printed steering wheel which provides haptic feedback to users.
- Programmed the wheel to precisely adjust to user-specified angles and using Arduino.

EDUCATION

MSc in Design and Digital Media Sep 2025 - Aug 2026

The University of Edinburgh
Concentration: UX & Interaction Design

BS in Mechanical Engineering Sep 2019 - Jun 2023

Stanford University
Concentration: Product Realisation (Design & Manufacturing)

SKILLS
